Maximum marks	4 Marks

Brainstorm & idea prioritization

Digital Naturalist - AI Enabled tool for Biodiversity Researchers

10 minutes to prepare

2-8 people recommended

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

5 minutes

PROBLEM STATEMENT

How might we help people identify the biological species of the plants and animals around them?

Write down any ideas that come to mind that address your problem statement.

10 minutes

Ask native people

Guess species based on geographic location

Image based species prediction

Guess the species type based on climate

Accessing state
government
tourism portal to
know native
species

Test for contact poisoning by placing a piece of plant near the skin.

Be aware of strong, unpleasant, musty odour, as they are indication of poisonous plants.

Find out the type of plant by noticing its venation and flower type.

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

→ 20 minutes

Feasibility

Regardless of their importance, which tasks are more feasible than others? (Cost, time, effort, complexity, etc.)
